File Updates

- Corrected and Re-uploaded some .java files as there were errors when compiling. (Sora 18 Oct)

- Connected .jsp files for assignments to the StudentAssignmentServlet based on the navigation diagram. Does not display data... links to other jsp files via the servlet only. Added web.xml so the servlet could be accessed from inside the package. (Sharlene 18 Oct)
- In the process of connecting 'discussion,' 'grades' etc together with servlets. (Sharlene 18 Oct)
- All the jsp pages in the students View is connected from 'CourseMenu.' Also, there is no servlet mapping yet to the servlets that are only used on the teachers view. New jsp pages (Sharlene 19 Oct)
- Should navigate to http://localhost:8080/c3238179_c3220929_c3197198_FinalProject/CourseMenu.jsp
- Jsps still need to have back arrows to link to the previous page (Sharlene 19 Oct)
- Updated style.css (Sora 19th Oct)
- Finished defining database (NuBoard_DB.sql), some queries need fixing though. (sora19oct)
- Finished adding foreign keys in the sql tables. Some ids were changed to chars. Ran the script and everything is valid (no syntax errors) (Sharlene 19th Oct)

Also, the class diagram has to be updated because there were some extra classes added.
